

4750FB3-12

NEW GENERATION OF SOFT BAGS

- 600 Denier polyester: used in areas with no risk of damaging the bag with a tip or any tool part. Provides flexibility and lightweight
- 1680 Denier polyester: used in areas with big risk of damaging the bag with a tip or sharp edge. Also in areas that need to be better protected against frictions or because they will stand big loads
- 100% Waterproof and anti slippery plastic hard bottom included in all the bags; provides big strength to the bag and protection against impacts thanks to the double stitching reinforcement
- HD PVC zips

Multiple screwdrivers elastic section
In front and back side

Divers height pockets
replicated in both sides

HD reinforced handle
provides stability and strength the bag

Central big compartment
for bigger tools or material

Measuring tape, card holder & phone pocket on one side

Big bottom pocket
Including a plastic box for small consumables: screws, nuts, washers, terminals

HARD BOTTOM
100% waterproof
